(Opening Title)

Modernize IT Networks Today for a Better Tomorrow

(Slide 1)

Modernizing government IT systems to meet your mission requires a reliable and secure network backbone.

(Slide 2)

Federal IT professionals believe SDN, cloud services and cybersecurity are very important in federal agencies' network modernization plans for the next five years.

(Slide 3)

How do you create a network infrastructure that accelerates your mission?

(Slide 4)

Modernizing government networks requires a hybrid approach to networking.

(Slide 5)

CenturyLink's network expertise spans across all layers of a hybrid network.

(Tiramisu Layers Animation Build)

- Optical Fiber Infrastructure
- SONET/DWDM Connectivity
- Packet-Switch Networks
- Integrated Control
- Cloud Communications
- Applications

(Side Bar Layers Animation Build)

- XaaS
- Cybersecurity
- Continuous Diagnostic Monitoring

VIDEO

(Slide 6)

From fiber, Ethernet, MPLS and cloud solutions.

(Slide 7)

To managed network services, big data and other application services,

(Slide 8)

All protected by our network based cybersecurity services.

(Slide 9)

CenturyLink hybrid networking solutions and services deliver...

(Slide 10)

Enhanced cybersecurity

Protect mission critical data and assets.

(Slide 11)

Network convergence

Deliver seamless integration of voice, video and data communication in one IP network.

(Slide 12)

Cost efficiencies

Deliver new services while balancing costs of legacy infrastructure.

(Slide 13)

Simplified management

Centralized management eases staffing constraints while enabling greater network visibility.

(Slide 14)

CenturyLink helps federal agencies to modernize your network today to deliver a better tomorrow.
